Erin - Here are the figures. I noticed the surface water and sediment figure needs a couple minor changes. SW-1 and SD-1 should line up with the water. SW-2 should be moved slightly to show it was taken in the water.

I will call you at 10:30 AM. I'll send a meeting request.

Thanks,

Mike

Hi Erin

I'll send you a location map when I'm back on Monday. Let's plan on talking on Tuesday if you are available. How about 10:30 am?

Thanks

Mike

Mike, I think it would be best to do what we did with the last invoice. When I get back in the office on Monday, I'll reject the invoice and Tetra Tech can resubmit the corrected invoice.

Just as an FYI, the data was supposed to be back to me from the lab as of tomorrow. We talked today and the data will be delayed, they are thinking a week. I will keep you posted on that. Is there any way you can send me a map of where the samples were collected?

As for the rest of the project, I think it might be good if Mike and I meet sometime next week for a short meeting to discuss the report. We've already discussed the SPA remedial options, and the risk assessment memo you sent is under review by the project's risk assessor. Please do not start on the risk assessment until we hear back from him. I don't want to start on something and a comment he makes change our direction given the monetary restrictions on this site. Mike, please let me know when you are available next week so we can discuss the report. I don't think it will be a long conversation. Actually, it might help to have a table of contents so that we can verify we are both on the same page. I know that figures usually eat up a budget, so please include a list of figures.

Please let me know if you have any questions. Thanks!

Subject: Rental car charges for July invoice START Task 0144

Erin:

I apologize for the delay. I was out Tuesday and Wednesday. Rental car charges for July, which occurred in June, are as follows:

June 3: Picked up lab supplies from EPA Lab prior to the sampling event using Mini Van #2. 1 day at \$16.08/day. \$16.08

This is a legitimate charge that was necessary for picking up lab supplies that would have to be shipped, which would likely cost more.

June 13-14: Picked up sample cooler ice and delivered environmental samples to EPA Lab using Mini Van #1. 2 days at \$34.45/day. \$68.91. This probably should have only taken one day. Also, with a little better planning we could have used the same rental van before it was turned in. Therefore, Tetra Tech recommends short paying \$68.91. Please let us know so we can modify the accounting on our end.

I spoke with Ted and we are in agreement.

Thanks,

Mike
